

NONIUS .SIGNAGE

Nonius offers several Digital Signage solutions for hotel public areas. The solution offers four key features: Corporate Channel, Digital Concierge, Airport Info, and Meeting Room. With the Corporate Channel, a hotel can effortlessly promote its image and services, and display key information in a public area on one single TV screen. The Digital Concierge provides guests with touch screen access to information about the hotel, services, promotions, events, and even local tourist attractions. The Airport Info feature provides real-time flight schedules from nearby airports. Finally, the Meeting Room keeps conferences attendees and guests updated with the latest information about scheduled events or meetings in progress throughout the entire hotel, as well as supporting the promotion of any hotel service or special offers planned for the week.
