

NONIUS.HSIA

Nonius Internet Access solution allows internet throughout the hotel using Wi-Fi or cable. This highly reliable and secure HSIA system lets guests connect seamlessly via any mobile device including laptops, smartphones, and tablets. Hotels can freely define their service and business models based on bandwidth, traffic utilization, or time. This way, services can be tailored to meet the hotel and guest profiles. In addition, the revenue is exclusively for the hotel and not a 3rd party operator. The customizable login portal is designed to capture the essence of the hotel brand image while promoting its key services.
